**DETAILED ACTION**

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/03/2008 has been entered.
2. Claims 1-5 remains cancelled and 9-10 are still withdrawn from consideration.
3. Claims 16-17 are added and now, claims 6-17 are presented for examination.

**Election/Restrictions**

4. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 6, 14-15, and 7-8, drawn to a method and a device for carrying out a lane allocation in multi-lane road, classified in class 703, subclass 008.
  - II. Claims 11-13, drawn to a method performing lane allocation of consecutive vehicles on a multi-lane road, including determining lateral displacement classified in class 701, subclass 017.
  - III. Claims 16-17, drawn to a method for lane allocation including using model-based lane and misalignment of a radar sensor, classified in class 701, subclass 001.
5. The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group III and vice versa, restriction for examination purposes as indicated is proper.

A telephone call was made to Messina, Gerard A. on December 8, 2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
